### EM PRODUCTS FOR EQUINE HEALTH: USAGE GUIDE

**NOTE:** These are the recommended guidelines for use of EM Pro-Equine, but use is not limited to the below. Many more applications are possible, including direct oral inoculations and hoof-baths. Please contact Efficient Microbes for further directions.

#### FEED AND WATER

<b>Immediately after birth:</b>	Apply 2-3ml EM Pro-Equine Inoculant directly into the foal's mouth through a syringe.
<b>1<sup>st</sup> and 2<sup>nd</sup> week:</b>	10ml EM Pro-Equine Inoculant per day
<b>2<sup>nd</sup> until 8<sup>th</sup> week:</b>	20ml EM Pro-Equine Inoculant per day
<b>3<sup>rd</sup> month on (and all ages):</b>	<ul style="list-style-type: none"> <li>○ Mix EM Pro-Equine into the horses' feed at a rate of 50ml/day. Mix with water as needed to get an even spread through the feed.</li> <li>○ Add EM Pro-Equine Inoculant to the drinking water at a rate of 1:1000.</li> </ul>
<b>Handling of illness/disease:</b>	Additional 50ml EM-Pro Equine Inoculant directly into the horse's mouth once per day.

#### TOPICAL

<b>Wounds or skin problems:</b>	Dilute EM Pro-Equine Inoculant 1:5 with water and dab the affected area 1-3 times per day.
<b>Odours and inoculation:</b>	Dilute EM Pro-Equine Inoculant 1:20 with water and spray the whole horse once daily for the handling of odours and inoculation against pathogens.

#### ENVIRONMENTAL APPLICATION

<b>Stall Fumigation:</b>	Spray Super EM diluted 1:50 with water (1:100 after first month) with a sprayer 2-3 times per week on the walls and floors of the boxes covered with straw or wood shavings. Spray more frequently where there are droppings and urine. In the case of wood shavings spraying can be more generous as these are very absorbent.
