

## APPLICATION GUIDE

### EQUINE

#### PRODUCTS

**Daily Probiotic/ Topical Use:** Pro-Equine

**Environmental:** Super EM

These are the recommended guidelines for use of Pro-Equine and Super EM, but use is not limited to the below. Many more applications are possible, including direct oral inoculations and hoof-baths. Please contact Efficient Microbes for further directions.

DAILY PROBIOTIC – FEED & WATER	
<b>Immediately after birth:</b>	Apply 2-3ml Pro-Equine Inoculant directly into the foal's mouth through a syringe.
<b>1st and 2nd week:</b>	10ml Pro-Equine Inoculant per day
<b>2nd until 8th week:</b>	20ml Pro-Equine Inoculant per day
<b>3rd month on (and all ages):</b>	<ul style="list-style-type: none"> <li>• Mix Pro-Equine into the horses' feed at a rate of 50ml/day. Mix with water as needed to get an even spread through the feed.</li> <li>• Add Pro-Equine to the drinking water at a rate of 1:1000</li> </ul>
<b>Handling of illness/disease:</b>	Additional 50ml Pro Equine directly into the horse's mouth once per day.
TOPICAL TREATMENT	
<b>Wounds or skin problems:</b>	Dilute Pro-Equine 1:5 with water and dab the affected area 1-3 times per day.
<b>Odours and inoculation:</b>	Dilute Pro-Equine 1:20 with water and spray the whole horse once daily for the handling of odours and inoculation against pathogens.
ENVIRONMENTAL APPLICATION	
<b>Stall Fumigation:</b>	<ul style="list-style-type: none"> <li>• Spray Super EM diluted 1:50 with water (1:100 after first month) with a sprayer 2-3 times per week on the walls and floors of the boxes covered with straw or wood shavings.</li> <li>• Spray more frequently where there are droppings and urine. In the case of wood shavings spraying can be more generous as these are very absorbent.</li> </ul>
